Identification of 10 new needy students for 2010 to 2011 academic year

- For the past 2 academic years identification of children was done in collaboration with teachers, school committee and NAMASO but students were not given a test as a result number of failures was high. So board and management decided to introduce amplitude test to the identified form 1 needy students in order to reduce the number of failures in class.
- 14 (7 girls, 7 boys) needy students were identified and all were given an amplitude test (English and Mathematics).
- 7 students scored above 50 % but we selected the best 10 students even though some scored below 50%. We gave them a test to reduce the number of failures on our bursary list. The identified students and their scores are as follows:

NO	NAME OF STUDENT	SEX	AGE	GRADE%	VILLAGE	WHO DIED
